English (Fluent)
Afrikaans (Fluent)

PROFILE

Project Manager with experience coordinating cross-functional teams, managing stakeholders, and driving projects from planning through execution across multiple business departments. I work with AI tools every day and look for ways to use them to make processes faster and smarter. I bring structure to complexity, and I am at my best keeping multiple moving parts aligned and pushing initiatives toward measurable outcomes.

WORK EXPERIENCE

Project Manager
December 2025 - present

Artefact South Africa

Engaged on Artefact's account with one of South Africa's largest retail groups, coordinating a cross-functional team of Data Analysts, Designers, Brand Teams, CRM Teams, and Developers, spanning both Artefact and client-side resources, to deliver data-led, personalised marketing campaigns within the client's omni-channel precision marketing department.

- **Process & Ways of Working Transformation:** Redesign and drive adoption of new processes, using data and AI models to move to a more strategic, customer-first approach (RACI matrices, org structure mapping, and Miro-based workflow documentation), from design through rollout and change management.
- **AI & Automation:** Use Claude and other AI tools daily for research, analysis, briefing and reporting, and have tested AI to automate parts of the campaign briefing process.
- **Data Team Management:** Manage the work of internal data analysts and engineers, tracking and prioritising in Asana, and working from Databricks scripts to run campaign analyses and reporting.
- **Brand & Campaign Strategy:** Advise brand managers on what the data says, which channels and communication types to use, and what past campaign performance means for upcoming campaigns.
- **CRM & Campaign Coordination:** Run campaign briefing with brand teams, audience builds with the data team, QA, and execution coordination with CRM teams.
- **Reporting & Governance:** Build and maintain production schedules, deadline trackers, and status reporting to ensure on-time, high-quality campaign delivery.

Junior Operations & Strategy Analyst
February 2025 - November 2025

Ozow Pty (Ltd)

Supported cross-functional strategic and operational initiatives at one of South Africa's leading fintech companies, informing growth decisions and improving operational efficiency.

- **Strategic Planning & Execution:** Contributed to short-term initiatives and long-term strategic plans through market research, competitor benchmarking, and performance analysis.
- **Business Cases & Insights:** Developed business cases within a product team and analysed financial data, performance metrics, and market trends to deliver actionable insights.
- **Cost Optimisation:** Analysed internal cost structures and unit economics, identified gaps in costing, and found cheaper alternatives to reduce costs.
- **Strategic Finance:** Worked with the Strategic Finance and Core Finance teams on pricing strategy and planning, vendor and bank billing validation, and financial analysis.
- **Cross-Functional Collaboration:** Worked daily with product, finance, marketing, and operations teams, gaining exposure to almost every part of the business.
